Economic Analysis of the Impact of Green City, Clean Waters (GCCW) on the City of Philadelphia

ESI was commissioned to measure and articulate the local economic impact of GCCW in its first five years. This report demonstrated the significant economic impacts that GCCW on the City of Philadelphia, the local economy and real estate markets.

Open Space in SE Pennsylvania

Econsult and Economy League of Greater Philadelphia estimated the economic, environmental, recreational, health, and property value benefits of protected open space in the Philadelphia five-county region.

At Econsult Solutions, Inc. (ESI), we understand that sustainability and environmental consciousness must be a focus of economic development and community planning. Our analytical assistance goes beyond basic understanding of environment impact in order to provide an increased depth to our analyses and reports.

We apply our expertise in economic development, market analysis, and economic impact assessment to thoroughly evaluate the potential strength and impact of green initiatives. With our detailed research and comprehensive reports, we can support green and sustainable programs with internal planning and strategy and external funding and proposal development.

Our business advisory services include:

- Economic & Fiscal Impact Assessment.
- Property Value Impacts.
- Ecological, Aesthetic, Recreational, & Social Impacts.
- Survey Preparation, Data Collection, & Statistical Analyses.
- Project Evaluation.
- Academic Research.

Our experts include: **Lee Huang, M.P.A.**, whose areas of practice include waterfront development, historic preservation, economic development, and economic and fiscal impact. Lee Huang is also a board member of Sustainable Business Network of Greater Philadelphia and Community Design Collaborative; **Robert Stokes, Ph.D.**, has a vast background in urban environmental studies and public policy, having worked on projects such as neighborhood commercial corridor planning, the impact of the built environment on health outcomes, and environmental sustainability planning; and **Mr. Steven Nelson**, whose expertise includes economic development, open space preservation and trail development, and strategic partnerships; and he has developed high-profile initiatives such as a \$150M open space program, a \$50M revitalization program, and the country's first climate change action plan.
