Econsult Solutions, Inc. (ESI) provides high quality economic research and statistical analysis in support of litigation.

We offer vast industry experience to address issues and deliver rigorous work products in a client-oriented atmosphere. Our experts have extensive experience working on real estate and other valuation, breach of contract, bankruptcy, interest rates issues, and other commercial damages cases.

Our clients include national law firms, as well as regional and local firms. Potential damages in our projects range from tens or hundreds of thousands of dollars to a billion dollars.

Our clients benefit from our past and current research experience, which make our work clear, rigorous, and defensible. In addition, our extensive teaching and litigation experience allows us to explain complex economic issues clearly to our clients, judges and jurors.

Our experts include PhD economists, university instructors, former high-level government officials, highly skilled researchers, analysts and modelers who have collectively worked in more than forty industries for both large and small law firms and have the ability to take on projects of any size. Our customized approach allows us to meet the full range of our clients' needs.
